FOR IMMEDIATE RELEASE
 MEDIA ADVISORY

Reinventing the Press Conference: Chat Room Sessions from ACS National Meeting in Salt Lake City

Update: [Click here](#) for a list of our scheduled online press briefings.

The American Chemical Society (ACS) Office of Communications is offering the news media the opportunity to join press briefings whether covering the meeting onsite or from a remote location. This new updated format during ACS' 237th National Meeting Mar. 22-26 in Salt Lake City will provide access to the increasing number of journalists who cover scientific meetings

Update: [Press Conference Chat Room Schedule](#) this

Borrowing the popular chat room concept from the Internet, we will provide news media with access to both real and virtual chat room sessions during the Salt Lake City meeting.

Reporters attending the meeting can gather with scientists in an informal setting in our Press Briefing Room at the Salt Palace Convention Center, Hall A, in Salt Lake City. Scientists will summarize their research and field questions. Offsite reporters can enter a virtual version of this Chat Room over the Internet. In addition to seeing and hearing the real-world activity, offsite reporters can submit questions.

ACS Conference Management

ACS manages hundreds of meetings a year from local gatherings to nationally- and internationally-renowned exhibits and conferences drawing scientists from around the world.

Our Services

Site selection and contract negotiation – Recommend and research venues and negotiate a contract that best meets your needs in terms of room rates, meeting space and food and beverage requirements

Housing – Manage housing for your conference, set up online room reservations, room block management and online reports

Registration – Set up online registration, collect revenue, provide badges, and on-site meeting management

Technology – Provide 24/7 access to registration and meeting information

Logistics – Coordinate audio-visual, room set-up, and food and beverage needs

Financial Services – Develop and manage budget, collect revenue, pay bills and report activity

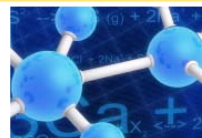

Marketing – Coordinate advertising in publications and production of programs

Abstract Management – Provide an abstract management system to collect abstracts, organize presentations and provide a printed program, abstract books and CDs.

Reporting – Pre- and post-meeting reports on finances and attendance

Package Plans – Every group is different. ACS recognizes that you may have a pre-established relationship with some trusted contractors and vendors.

Great Chemistry Happens

Join the Act 4 Chemistry Network

Legislation that may impact the chemical enterprise comes before Congress on a regular basis, and the American Chemical Society is committed to keeping its members informed and encouraging them to weigh in on high-priority issues.

One of the main ways we do this is through the Web site act4chemistry.org and the Act 4 Chemistry Network.

Stay informed

The Act4Chemistry.org blog delivers timely science policy news and commentary plus links to the latest articles on science policy matters. It's a great way to stay up-to-date on federal legislation. Also, ACS members who [join the Act 4 Chemistry Network](#) may post comments to the Act4Chemistry blog.

Take Action

Act4Chemistry.org is also the home of the Society's grassroots program, the [Act 4 Chemistry Network](#). Currently, the Act 4 Chemistry Network gives over 18,000 ACS members an easy, effective way to voice opinions to legislators. It is one of the most effective groups in the ACS. In 2008, A4C Network members sent 11,500 letters to policy makers on issues like science and math education.

Network members receive timely Action Alerts roughly 8 times per year via e-mail urging them to contact their legislators on issues of concern to ACS members. The network focuses primarily on federal science education and R&D policy, but also addresses environment, workplace, and technological competitiveness.
